The Form Time Quiz: Volume Two

A ten-question quiz played in small teams, with a printed answer sheet for each team. Six questions are on a theme and four are general knowledge: animal myths for Year 7 to 9, spotting fake news for Year 10 and 11, and thinking traps for sixth form. Teams swap sheets and mark each other's as the answers go up. It takes about fifteen minutes, and the only printing is one sheet per team.

Print these

Page	What it is
Page 2	The answer key for all three quizzes, with sources, for you
Page 3	Spare questions on each theme, for you
Page 4	Team answer sheet for Year 7 to 9
Page 5	Team answer sheet for Year 10 and 11
Page 6	Team answer sheet for sixth form

How it works

Step	What happens	Slides
1	Put the form into teams of three or four and give each team the answer sheet for your key stage.	1
2	Read each question out as it goes up. Teams agree an answer, then tick a box or write it on their sheet.	2 to 13
3	Teams swap sheets with the team next to them. Show the answers one at a time and give the room a moment on each one.	14 to 24
4	Give the sheets back, and find out which teams got full marks.	25

Worth knowing

- Print one sheet per team for the key stage you teach. The sheets have boxes to tick and space to write in, but not the questions, so keep each question on the board until every team has answered.
- Every answer on the theme comes from a real study or a trusted source, named in small print at the bottom of the answer slide. If a student pushes back, the source is there to look up.
- The last two slides are blank, for questions of your own, and each answer sheet has two spare rows for them. Page 3 has spare questions on each theme if you want to swap one in.

> ***Volume Three is available now, with new themes. Follow @thepastoralguide to hear when the next one is out.***

Answer key

All thirty answers in one place, for marking or for settling an argument. The slides carry the same answers, with a line on why and the source for each themed one.

YEAR 7 TO 9

1	**Myth**	Bats are blind. *US Geological Survey*
2	**Myth**	Lemmings jump off cliffs together on purpose. *Alaska Department of Fish and Game*
3	**A, Fat**	What does a camel store in its hump? *San Diego Zoo Wildlife Alliance*
4	**B, Two**	Humans have three types of colour-sensing cell in their eyes. How many types do dogs have? *Neitz, Geist and Jacobs, 1989*
5	**C, 270 degrees**	An owl cannot turn its head all the way round. How far can it turn its head in either direction? *Johns Hopkins University, 2013*
6	**C, Almost a year**	Fish were trained to escape through a net. How long did they still remember the way out? *Brown, Animal Cognition, 2001*
7	**A, Jupiter**	What is the largest planet in our solar system?
8	**Cairo**	What is the capital city of Egypt?
9	**C, Eight**	How many legs does a spider have?
10	**Antarctica**	Which continent has no countries?

YEAR 10 AND 11

1	**C, About six times faster**	In a study of stories shared on Twitter, how did false stories spread compared with true ones? *Vosoughi, Roy and Aral, Science, 2018*
2	**Fact**	Seeing a false claim several times can make it feel true, even when you already know the right answer. *Fazio et al., 2015*
3	**B, Open new tabs to see what other sites say about it**	When professional fact-checkers want to know if a website can be trusted, what do they do first? *Wineburg and McGrew, Stanford*
4	**A, About half the time**	In a 2022 study, people looked at photos of faces and said whether each was real or made by AI. How often were they right? *Nightingale and Farid, PNAS, 2022*
5	**Fact**	Asking people to check whether one headline is true can make them share more reliable news afterwards. *Pennycook et al., Nature, 2021*
6	**C, More than eight in ten**	In a Stanford study, students looked at a news website. How many thought an advert marked “sponsored content” was a real news story? *Stanford History Education Group, 2016*
7	**Mercury**	What is the smallest planet in our solar system?
8	**Carbon dioxide**	Which gas do plants take in from the air to make their food?
9	**B, Diamond**	What is the hardest natural material on Earth?
10	**Ottawa**	What is the capital city of Canada?

SIXTH FORM

1	**B, Anchoring**	After spinning a random 65 on a wheel, people guessed a higher share of UN countries were in Africa than those who spun 10. What is this trap called? *Tversky and Kahneman, Science, 1974*
2	**Fact**	In a 1985 study, most people chose a ski trip they said they would enjoy less, because it had cost more. *Arkes and Blumer, 1985*
3	**C, 78%**	A disease will kill 600 people. Told a plan “saves 200 people”, 72% chose it over a gamble. Told it means “400 people will die”, what share chose the gamble? *Tversky and Kahneman, Science, 1981*
4	**A, 55 days**	University students guessed their final-year project would take about 34 days. On average, how long did it actually take? *Buehler, Griffin and Ross, 1994*
5	**A, About nine in ten**	Researchers watched CCTV of 219 real arguments and fights in public in the UK, the Netherlands and South Africa. In how many did at least one bystander step in? *Philpot et al., American Psychologist, 2019*
6	**Myth**	Linda is 31, studied philosophy and cares deeply about discrimination. It is more likely that she is a bank teller and a feminist than that she is a bank teller. *Tversky and Kahneman, 1983*
7	**Nepal**	Which country’s national flag is made of two triangles, one on top of the other?
8	**B, Ankara**	What is the capital city of Turkey?
9	**Hydrogen**	Which element has the atomic number 1?
10	**A, Portuguese**	What is the official language of Brazil?

Spare questions

More questions on each theme, checked against the same kind of research. Swap one in for a question your form already knows, or put it on the blank slides at the end of the deck.

YEAR 7 TO 9 · ANIMAL MYTHS

Fact or myth: ostriches bury their heads in the sand when they are scared. Answer: Myth. A scared ostrich lies flat with its neck along the ground, so from far away its head seems to vanish. *Source: San Diego Zoo Wildlife Alliance*

Fact or myth: hippos sweat blood. Answer: Myth. Hippos give off a red liquid that works as a sunscreen and kills germs, but it is not blood. *Source: Saikawa et al., Nature, 2004*

Fact or myth: if you touch a baby bird, its parents will reject it. Answer: Myth. Parent birds do not abandon their young because of a human smell. It is still best to leave wild babies alone. *Source: Cornell Lab of Ornithology*

Fact or myth: sharks never get cancer. Answer: Myth. Scientists have recorded tumours in sharks and their relatives, including cancers, since the 1800s. *Source: Ostrander et al., Cancer Research, 2004*

Chameleons with the biggest colour changes mostly use them for what? A) Hiding from predators B) Signalling to other chameleons C) Scaring off insects Answer: B, signalling to other chameleons. In a study of dwarf chameleons, the biggest changes were for showing off in contests and courtship, not for blending in. *Source: Stuart-Fox and Moussalli, 2008*

YEAR 10 AND 11 · SPOT THE FAKE

Fact or myth: bots are the main reason false news spreads faster than true news on Twitter. Answer: Myth. When researchers took all the bots out, false news still spread faster, because people were sharing it. *Source: Vosoughi, Roy and Aral, Science, 2018*

Fact or myth: playing an online game where you pretend to make fake news can make you better at spotting it. Answer: Fact. After playing the game Bad News, players rated fake headlines as less reliable, and their trust in real news stayed the same. *Source: Roozenbeek and van der Linden, 2019*

Fact or myth: people are good at spotting deepfake videos. Answer: Myth. In a 2021 study, people were poor at spotting deepfakes, tended to assume videos were real, and thought they were better at it than they were. *Source: Köbis et al., iScience, 2021*

The SIFT method for checking a claim online starts with which word? Answer: Stop. SIFT stands for Stop, Investigate the source, Find better coverage, and Trace the claim to where it started. *Source: Caulfield, SIFT method*

SIXTH FORM · THINKING TRAPS

In the 2-4-6 task, people tested sets of three numbers to find a hidden rule. Out of 29 people, how many got it right first time? A) 6 B) 15 C) 25 Answer: A, 6. Most only tested numbers that fitted their own idea, such as "goes up in twos". The rule was simply any three numbers that go up. This is confirmation bias. *Source: Wason, 1960*

In a 1978 study, people thought accidents and diseases caused about the same number of deaths. About how many times more deaths did diseases cause? A) 2 B) 5 C) 15 Answer: C, about 15 times. Dramatic deaths come to mind more easily, so people overestimate them. This is the availability trap. The figures are from the USA in the 1970s. *Source: Lichtenstein et al., 1978*

Fact or myth: once people know how something turned out, they tend to think they would have predicted it. Answer: Fact. Knowing the outcome made people rate it as more likely than they would have beforehand, without realising. This is hindsight bias. *Source: Fischhoff, 1975*

A fair coin has landed heads five times in a row. What is the chance the next flip is heads? A) More than 50% B) Exactly 50% C) Less than 50% Answer: B, exactly 50%. A coin has no memory, so tails is never "due". Expecting it to be is the gambler's fallacy. *Source: Probability*

Team answer sheet

The questions are on the board. For each one, agree an answer as a team, then tick a box or write it in. When the answers go up, swap sheets with the team next to you and mark theirs in the dashed boxes.

TEAM NAME _____

MARKED BY _____

MARK

ROUND ONE Animal myths

1	FACT OR MYTH	☐ Fact	☐ Myth
